## Wow!

Jerry Kackley General Manager/CEO

As I sit back and "ponder" on the events of these past few weeks, one word comes to mind...WOW!

WOW! I feel so very fortunate to be selected as the new general manager/CEO of this wonderful organization. The board has given me the opportunity and responsibility to help guide GMEC into the future. I appreciate this vote of confidence and I promise to use the same common sense, work ethic and compassion that my parents instilled in me. While they are no longer with us in this world, I know they will be guiding my decisions from a better place.

WOW! What a storm! In my 50 years on this earth, I have seen the fury of nature many times... the blizzard of 1978, the flood of 1998, the ice

storm of 2010...and all of these brought challenges with them. But none of these compare to the challenges faced by your cooperative on Friday evening, June 29.

WOW! I have never seen such "instant and total destruction." Trees uprooted, broken, splintered...scattered across yards and roads. Buildings blown over, roofs shredded, homes destroyed...friends and neighbors suffering...but alive and safe...thank God!

WOW! This was big...three-quarters of our members were without power. Poles and wire were down all over our nine-county service territory. Six of our substations were down as the AEP transmission lines that bring power from the Cardinal Plant were damaged. Our linemen were out in the storm trying to assess the damages...other employees were in the office dealing with the chaos...all working together to get the lights back on. It almost seemed hopeless...but we never lost hope.

WOW! Our neighboring co-ops from Ohio, Pennsylvania and Kentucky answered our calls for help and sent crews to aid in the restoration. We are indeed a cooperative family and this family stretches across state lines. Thank you!

WOW! The heat...it was almost unbearable...dangerous. Our employees and our members struggled through the worst week of heat and oppressive humidity that I can ever remember. But slowly...the lights began to come back on. After around eight days of misery, our work was done...but not quite. The power was "on" but the clean-up was just beginning; weeks of work were waiting.

WOW! What a pain in the behind! Sometimes I take electricity for granted... not realizing how much of a "necessity" it is in my everyday life. Without it...no water, no AC, no lights, no refrigerator...miserable! I cheered out loud when the lights came back on at my house after seven days.

WOW! THANK YOU MEMBERS...for your patience and understanding during this terrible event...the worst in our history. I know that it was a difficult week for many of you...it was for us too. I won't apologize for the length of the outages...instead, I applaud our employees and the effort that each and every one of them gave...that type of effort brings one word to mind...WOW!

Ray Crock, Energy Advisor

## How can my electric use be up?

Even though you are reading this in September, I am writing it in late July. I can already anticipate the calls that will come in August as members get bills for their June 15 to July 15 electricity consumption. The question will be, "How can my electric use be up when my power was off for three to eight days? This can't be possible"...or can it?

It is not only possible, but probable. It is true for myself as well. Our power was off for four days or about 13 percent of a month; yet our elec-

tric use was 1,828 kWh compared to 1,282 kWh for the previous month and we read the religiously on the 15th of every month. How could we use 42 percent more electric when the power was off for 13 percent of the month? Very easily.

"Let me count the ways," is the old saying. Everyone's circumstances are different but most are similar. When the power came back on, many appliances

As a member of an electric cooperative, you have access to free energy savings tips and information that also will help yhou save money. We also offer in-home energy audits.

Whether your question is about heating and colling systems, weatherproofing and insulation, water heaters or other appliances, the Energy Advisor at GMEC can help.

Call your co-op office today to have your quesitons answered. 800-521-9879

Guernsey-Muskingum Electric Cooperative

worked overtime to catch up like freezers, refrigerators and water heaters. And let's not forget that huge pile of laundry that built up to be washed and dried. "But that would not raise the bill because it would have been done anyway," you would say. And I totally agree, this would not increase your consumption, but it would defer some to when power was restored.

The real reason for the increase is a simple subject of cooling degree days (CDD). A CDD is each degree difference between the day's average temperature and 65 degrees. For example, if the day's average is 75 degrees, then that day would accrue 10 CDD. This is the best way to measure the amount of cooling load (and power) that is required to keep our home or business comfortable. We all know that the past two summers have been hot, but do you realize just how much so? The last time we had this much heat was 1999.

Now to answer the question of increased electric use with the power out several days. The average CDD for July 2007 to 2010 was 290. This year will be very close to last year at about 478. If your power was out for seven days and on for 22 days, that would be on for 77 percent of the month. 77 percent multiplied by 478 CDD is 368 CDD. That is still 27 percent more CDD than the previous four-year average of 290, and therefore 27 percent more electric use.

I have tried to simplify what seems to be complicated numbers. But I do know that my central air uses about 33 cents every hour it is running. It did not run for several days, my bill was up and it would have been higher had I not lost power. I would have gladly traded a higher electric bill with AC for the sweltering days I had no air, and a much higher gasoline bill to run a generator (that was too small to run the air conditioner).

Using compact fluorescent lamps (CFLs) in outdoor lights can save money and energy because these lights stay on the longest. ENERGY STAR-qualified CFLs use 75 percent less energy than traditional incandescent bulbs. To save even more, look for fixtures designed for outdoor use that have automatic daylight shutoff and motion sensors. Learn more at www.energysavers.gov.

## From the tailgate

I am writing this on July 29, and with the manager change to occur on Wednesday, Aug. 1, it's safe to say this is the last article I will be writing as the General Manager/CEO of Guernsey-Muskingum Electric Cooperative. After a career of nearly 33 years, 18 as general manager, I felt ready for a change. Retiring is the proper term, but I feel like it might better be called 'retreading,' as I hope there is still a little tread left on this old tire!

These are turbulent times in our country, and no less so at your cooperative. Since I informed the board of trustees in January of my intention to retire this year, the turbulence has gotten a little stronger. In the first half of this year, we had mild weather for electricity sales up through June, making finances difficult in an already difficult financial year. But in a twist, once we finally have good hot weather for electricity sales, Mother Nature dealt us a blow on June 29 with the biggest storm that I can remember in my career. This storm was a record in recent times by any measure, maybe ever. These were followed by two milder storms in July. I guess the Good Lord was making sure I was not going to change my mind. The employees of the cooperative responded in record fashion, and I felt blessed to be part of our restoration efforts.

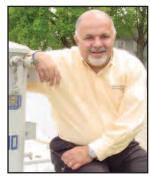

I would like to thank the board of the cooperative for the opportunity to lead, the employees of the cooperative for the opportunity to do some great things together, and last, but not least, I would like to thank you, the members for your support. At every opportunity, annual meeting, regional meeting or just meeting members in our office, I felt strong member support for everything we have done.

Cooperative office will be closed on Monday, Sept. 3, so our employees and their families can celebrate Labor Day.

The office will be staffed for emergencies. For outage assistance, call 1-800-521-9879 or 740-826-7661.

We wish you a safe and fun Labor Day Weekend! Meeting you at these opportunities really reminded my why your cooperative is different from for-profit power companies. We are owned by those we serve, and I have been honored to be at your service, following in the tradition of two former general managers of your cooperative whom I have served with

Lyle McCormick and Mike McBride.

We have a strong board dedicated to great service, a great employee base that performs at its best when the chips are down, and a new general manager, Jerry Kackley, who I know has the ability and the drive to lead us through these turbulent times. I look forward to reading about the next chapter of our cooperative as my chapter comes to a close.

Thank you for the opportunity to serve and for your support and involvement in our cooperative. I could not have done it without you!

— Garry A. Mbiad, Retired

## OFFICIAL NOTICE MEDICAL CERTIFICATION

Medical certification forms are available upon request at Guernsey-Muskingum Electric Cooperative, Inc., office for those persons who must certify that disconnection of electric service would make the operation of necessary medical equipment impossible or impracticable, or that such discontinuation of electric service would otherwise be dangerous to the health and welfare of persons residing in the household.

In all cases where discontinuation of service would be especially dangerous to life and welfare of the occupants within a household, the consumer should contact the cooperative and request a "Medical Certification" form. This form must then be completed and certified by a licensed physician or local board of health and filed with the cooperative.

## Storm recap:

Derecho: a widespread, long-lived wind storm that is associated with a band of rapidly moving showers or thunderstorms

First outages reported: Friday, June 29

Number of meters without power at height of storm: 13,200

Percentage of meters without power: 79% Number of substations without power: 6 Number of broken poles: 114 and climbing Number of damaged transformers: 43

Number of personnel in the field during the day: 60 to 65

Number of hotel rooms for outside crews: 14

Number of hours GMEC personnel worked during restoration: 4,002

Average high temperature during the week of restoration: 96 degrees

Number of days record high temperatures were set that week: 3

Number of work-related injuries or accidents: 0

Last day of restoration: Sunday, July 8

Estimated total cost to your cooperative: \$1.3 million

## Would you please help your cooperative find former members?

Guernsey-Muskingum Electric would like your help in locating the following former members (or their heirs) who received service from the cooperative in prior years.

Capital credit refund checks were mailed to former members listed in this *Country Living* issue. These checks have not yet cleared the bank or have been returned to Guernsey-Muskingum as "undeliverable."

If you have information on any of the names in the Capital Credit Refund Listing, would you please call the cooperative office at either of the numbers listed below and provide the information to the member accounting department.

The cooperative is aware that many of the former members listed are deceased. However, we are looking for surviving family members who are eligible to receive the capital credit check. Thank you for your help in locating our former members.

# Farm Science Review Bus Trip

Wednesday, Sept. 19

Yes, I/we would like to join our co-op and ride in a Muskingum Coach Tour Bus to the Farm Science Review at London.

Please reserve seats at \$25 each.

Name		 	
Phone			
Address			

DON'T WORRY ABOUT THE TRAFFIC, LEAVE THE DRIVING TO US!

Please make check payable to GMEC.

Enclosed is a check for \$

Your ticket covers the bus trip to and from the Review, plus a light breakfast and your ticket to the Farm Science Review.

Bus departs Cambridge at 6 a.m., and Zanesville at 6:30 a.m.

#### Mail or return to:

Guernsey-Muskingum Electric Cooperative, Inc. 17 S Liberty St, New Concord, Ohio 43762

For more information, call member services at 1-800-521-9879.

I will board the bus at

## Stealing electricity and meter tampering are crimes

Since August 1978, a revised Ohio law has been in effect covering theft of utility service and tampering with utility equipment. The statute provides that a person does not have to be seen tampering with a meter to be held responsible for such action. Prior to the revision in the law, it was difficult to prosecute a person for meter tampering unless the action was witnessed.

In addition, in prosecution for a user's reconnecting a device that was disconnected by a utility, such activity now is considered prima facie evidence that the user intended to defraud the utility.

The law defines theft of a utility service as a first-degree misdemeanor if the value of the stolen electricity, plus any utility equipment repair, is less than \$150. It's a fourth-degree felony if the value is more than \$150 or if the offender was previously convicted of the charge. Tampering convictions carry similar penalties.

Tampering is defined "to interfere with, damage or bypass a utility meter, conduit or attachment with intent to impede the correct registration of a meter or the proper function of a conduit or attachments."

Conviction can bring from six months in jail and a \$1,000 fine to five years in jail and a \$2,500 fine.

Meter tampering costs all of us. It costs the cooperative, and it costs you. And it's downright dangerous. If you witness someone tampering with an electric meter, contact your cooperative office. Stealing electricity is a crime, and anyone caught violating the law will be prosecuted.

### **OFFICIAL NOTICE** Certification of Active Duty Deployment Guernsey-Muskingum Electric Cooperative, Inc.

The cooperative will not disconnect electric service to the residential premises of any residential member who is deployed on active duty for nonpayment for electricity provided to the residential premises.

Upon return of the residential member from active duty, the cooperative will offer the residential member a period equal to at least the period of deployment on active duty to pay any arrearages incurred during the period of deployment. If the period the cooperative offers the residential member for repayment presents a hardship, the member may request a longer period to repay the arrearages. No late payment fees or interest will be charged to the residential member during the period of deployment or the repayment period.

"Active duty" means active duty pursuant to an executive order of the president of the United States, an act of the congress of the United States, or section 5919.29 or 5923.21 of the Ohio Revised Code.

The residential member must resume the timely payment of all charges for electric service provided by the cooperative after the return from active duty deployment.

In order to avoid disconnection of electric service for nonpayment for electric service during a period of active duty deployment, a completed Certification of Active Duty Deployment form must be submitted to the cooperative. Certification of Active Duty Deployment forms are available from the cooperative upon request.
